Over 650 terabytes of MongoDB data exposed on InternetSecurity Affairs

Last week my old hosting provider GoDaddy created me a lot of problems so I had no opportunity to write about this interesting story, now I passed to a better provider and I decided to do it. There are at least 35,000 vulnerable MongoDB databases exposed on the Internet, the data they contain is exp ... [READ MORE](#)

ClusterControl 1.2.12 - The Full Monty Release for MySQL, MariaDB, MongoDB & PostgreSQL

Cluster information

Cluster

Cluster ID	Name	Type	Status	License Status	License Expiration
1	MySQL async Cluster 1 replication		Cluster started.	License will expire in 12 days.	12 days left.

Nodes

Server Address	Node Type	Role	Status	Uptime (hh:mm:ss)	Operating System
10.10.12.11:3306	mysql	master	MYSQL_OK	00:26:04	centos-7
10.10.12.13:6603	maxscale	N/A	NODE_IS_UP	00:00:00	centos-7
10.10.12.12:3306	mysql	slave	MYSQL_OK	00:17:23	centos-7

Backup Summary

Backup Id	Status	Backup Time	Backup Method	Backup Type	Backup Host	Database	Storage Location	Size	Error
No backups were created in the specified interval. Have you created a backup schedule?									

Top Queries Summary

Db	Query	Count	Rows Examined	Rows Sent	Total Exec Time	Total Lock Time
No queries found. Have you activated the Query Monitor?						

Node status overview

Node 1 (10.10.12.11)

CPU Usage

Disk Throughput
