Synoptek Partners with Darktrace to Offer Advanced Cyber Defense

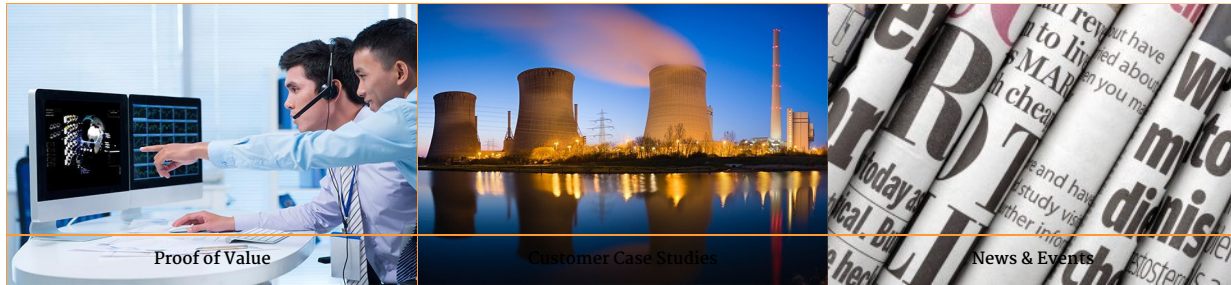

[\(press/2016/01/synoptek-partners-with-darktrace-to-offer-advanced-cyber-defense\)](#)

Darktrace is a world leader in Enterprise Immune System technology for cyber security.

Using new machine learning techniques based on the biological principles of the human immune system, Darktrace addresses the challenge of detecting previously unidentified cyber threats, irrespective of their origin.

Named 'Best Security Company of the Year' 2015, Darktrace is capable of identifying new, emerging threats within computer networks in real time. This unique capability is delivered by Darktrace's cyber intelligence software platform, which leverages advanced mathematical models to establish an evolving understanding of every device, user and network and stay ahead of developing APTs, insider attacks and other live threat scenarios.

“Darktrace’s approach to cyber security is very novel, and fitted with our strategy of making our cyber defence more proactive, with knowledge or pre-defined rules.”

Pier Alain Daubie, CIO, Sisleybay

Find out how Darktrace's unique approach can protect your enterprise or industrial systems from cyber threat.
