## 32C3 CTF: Docker writeup

*docker* was a pwnable worth 250 points during 32C3 CTF 2015. The goal was to escape from a (slightly non-standard) docker container configuration.

Sep 21, 2015

## CSAW 2015 - 'memeshop' writeup

'memeshop' was a pwnable worth 400 points in the latest CSAW CTF.

Jun 20, 2015

## DEFCON 2015 Qualifiers 'babyecho' writeup

This is my writeup for the "babyecho" challenge from the DEFCON 2015 Qualifiers. It was worth 1 Point. (That's probably the reason for the name *babyecho*.) Anyway, since this was my first time exploiting a format string vulnerability, I wanted to make a writeup.

Apr 26, 2015

## PlaidCTF 2015 - TP writeup

tp was an exploitation challenge consisting of two parts, in total woth 620 points. For PlaidCTF we (KITCTF) teamed up with StratumAuhuur as "Eat Sleep Pwn Repeat" and me and Stephen worked together to solve this challenge during the CTF.

Mar 30, 2015

## Advanced Heap Exploitation: 0CTF 2015 'freenote' writeup

*freenote* was a pwnable worth 400 points during 0CTF 2015.

Mar 27, 2015

## Boston Key Party 2015 'Wood Island' writeup

Originally, I wanted to write up the write-up for the airport challenge, but since Niklas has already done that, I'm doing the *Wood Island* challenge instead. It was worth 150 points on the Boston Key Party 2015.

Mar 16, 2015

# Smashing the Potato: Codegate 2015 'mashed_potato' writeup

*mashed_potato* was a pwnable worth 600 points during Codegate CTF 2015.

Mar 2, 2015

# Boston Key Party 2015 'Sullivan Square' writeup

*Sullivan Square* was a reversing challenge worth 350 points at the Boston Key Party CTF 2015.

Mar 1, 2015

# Boston Key Party 2015 'Airport' writeup

*Airport* was a cryptography challenge worth 500 points at the Boston Key Party CTF 2015.

Jan 19, 2015

# GITS 2015 CTF 'aart' writeup

*aart* was a web challenge worth 200 points at the 2015 GITS CTF. There were several ways to solve it, three of which will be described here.

Jan 18, 2015

# GITS 2015 CTF 'giggles' writeup

*giggles* was an exploitation challenge worth 300 points at the "Ghost in the Shellcode" CTF 2015.

Jan 12, 2015

# InsomniHack Teaser - elysium writeup

Just a quick writeup for the elysium (200pts) challenge from the InsomniHack Teaser CTF 2015. We ended up making the 6th place during the CTF :)

Jan 9, 2015

# 31C3 CTF 'saas' writeup

*saas* was an exploitation challenge worth 50 points at the 31C3 CTF.

Dec 30, 2014

# 31C3 CTF 'mynx' writeup

tl;dr 1 byte overwrite => use after free condition => information leak through a format string. Combined again with the first two steps to gain code execution via a controlled call to system().

Dec 30, 2014

## 31C3 CTF 'devilish' writeup

*devilish* was a web challenge worth 30 points at the 31C3 CTF.

Dec 1, 2014

## 9447 CTF 2014 'europe' writeup

During 9447 CTF 2014, europe was a series of 3 exploitation challenges, all using the same binary. Each one would yield a different flag and in total those three flags where worth 700 points (200, 120, 380).
